Best Time:	8AM-4PM

Rules of Conduct

None specified

Jacob's Creek CWMU Description

The Jacobs Creek CWMU is west of Morgan, Utah on the Morgan County side of the Davis – Morgan County boundaries. Higher elevation are on the west side of the Unit, ranging from 9200 feet in the north to **9300 feet** in the middle, then dropping to 9000 feet in the south. Jacobs Creek is a drainage in the northern part of the Unit. It ranges from 8600 feet to 5000 feet. Petersen Creek flows west to east and has three forks. The Right Fork starts about 8800 feet elevation, 7500 feet for the Middle Fork, and 7600 feet for the Left Fork. Petersen Creek exits the Unit at **5000 feet**. Another west to east drainage that has three forks is Dalton Creek. The Right Fork of Dalton Creek starts at 7400 feet, the Middle Fork at 7700 feet and the Left Fork at 7500 feet. After converging into Dalton Creek the forks exit the Unit at 5500 feet. Two other drainages are Smith Creek (8200 feet to 6600 feet) and Line Creek (8700 feet to 6800 feet) drain the Unit.

Rocky Mountain Gambel **Oak-Mixed Montane Shrubland** (41) is the dominant land cover type on the Jacobs Creek Cooperative Wildlife Management Unit (CWMU). It is mostly located on the north and east sides of the Unit. Rocky Mountain **Aspen Forest and Woodland** (22) is another major land cover type on the Unit, it runs down the middle and toward the west side of the Unit. In between the Shrubland and Forest and Woodland are patches of Inter-Mountain Basins Montane **Sagebrush Steppe** (62). Rocky Mountain Montane Mesic **Mixed Conifer Forest and Woodland** (32), Rocky Mountain Montane Dry-Mesic **Mixed Conifer Forest and Woodland** (30), and Rocky Mountain Subalpine Mesic **Spruce-Fir Forest and Woodland** (28) add to the Forest and Woodland character of the Unit. Rocky Mountain Lower Montane **Riparian Woodland and Shrubland** (79) intermixes with lower elevation Forest and Woodland types.
